

ACQUIRE 2.1.8 RELEASE NOTES

Release date: September 27th, 2025

Build version: 2.1.8

System requirements

- Acquire 2.1.8 is compatible with PANTHER 2 and all PANTHER units. See the PC requirements at the end of the document.

Main fixes and improvements

- Sliding TFM with less than 32 elements
- Mechanical synchronization between CIVA configuration and Acquire parameters
- Error message box popup window at the end of inspection
- Coherency between views and cursors on rotated C-scans

Compatibility

- Files produced with older versions of Acquire remain compatible with Acquire 2.1.8
- Acquire 2.1.8 data files will be compatible with future CIVA and Capture versions

Known issues, limitations, restrictions

- Due to the Motion improvement, trajectories could have to be reset

PC requirements

To run Acquire 2.1.8 with a PANTHER unit, optimal PC requirements are as follows:

- Windows 10 (64bits) or Windows 11
- Processor: Intel Core i7 or Intel Core i9
